

**LIFE  
IS FULL OF  
COMPROMISES.  
THIS  
ISN'T ONE  
OF THEM.**

If you want to be sensible, put your money in the building society.

If you want the motorcycling experience of a lifetime, invest in your new FZR1000.

Just standing still it raises our pulse rate. On the open road

it is simply breath-taking.

EXUP microcomputer controlled exhaust flow ensures instant response from the liquid-cooled 4-cylinder engine.

5-valve technology piles on the power.

And an immensely strong

aluminium Deltabox frame with advanced 'upside-down' forks and triple disc brakes give you firm and confident control.

Suddenly, you've forgotten your cares and remembered what real excitement is.

The Yamaha FZR1000,

FZR600 and the new FZR400RRSP.

Pure performance. No compromises.
